Logline:

We are a team of two committed artist with a desire to tell deep and meaningful stories that audiences can connect with. We want our stories to explore emotions and experiences that are not often showcased in popular media. We believe that film, and more specifically animation, can be an excellent medium for allowing the more abstract storytelling that we hope to explore. Finishing Touches is our first foray into these ideas, and we hope that it will be a good representation of what we can produce.
