DECLARATION

Throughout human history, ego and faith have been surprisingly equal motivators for some of the most tragic events in history. In this personal but equally universal tale, we explore some themes that concern us as artists but also as human beings.

Nevertheless, this film not only explores the frightening aspects of the human necessity to believe in something but also intends to shine some hope on the brave act of pursuing something we cannot see.

The creation of this fictitious culture and language, the adventure of filming in such breathtaking locations, and the privilege of working with such a talented team was a step forward for us in our early career as young filmmakers.

-Sebastian Torres Greene y Manuel Del Valle.
